

SIP Today. SWP Tomorrow.

Proposal in Brief

It is important to have a secure financial future and a stress free retirement. As time passes, the goal looks challenging.

Proposing to you, SIP Today, SWP Tomorrow: Invest small sums today, enjoy the fruits during retirement.

SIP helps create wealth over the long term. It allows the investor to invest small amounts at regular intervals and these small amounts reduce the impact of volatility in the short term. Historical evidence suggest that returns in equity markets are decent over medium to long term.

SWPs are the opposite of SIP. A fixed amount is transferred from your mutual fund portfolio to your bank account on a periodic basis. This acts as sort of pension where regular cash flows help meet expenses during retirement.
